The GATE 2021 score is calculated using the formula

$$GATE\ Score = S_q + (S_t - S_q) \frac{(M - M_q)}{(\bar{M}_t - M_q)}$$

where,

M is the marks obtained by the candidate in the paper, mentioned on this GATE 2021 scorecard

M_q is the qualifying marks for general category candidate in the paper

\bar{M}_t is the mean of marks of top 0.1% or top 10 (whichever is larger) of the candidates who appeared in the paper (in case of multi-session papers including all sessions)

$S_q = 350$, is the score assigned to M_q

$S_t = 900$, is the score assigned to \bar{M}_t

In the GATE 2021 score formula, M_q is 25 marks (out of 100) or $\mu + \sigma$, whichever is greater. Here μ is the mean and σ is the standard deviation of marks of all the candidates who appeared in the paper.

Qualifying in GATE 2021 does not guarantee either an admission to a post-graduate program or a scholarship/assistantship. Admitting institutes may conduct further tests and interviews for final selection.

Re: Support letter – Shiksha Dutta – Bourse PBEEE Québec-Inde

Dear colleagues,

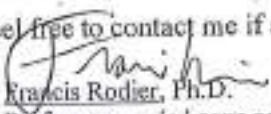

It is with great pleasure that I write this letter of recommendation in support of Ms. Shiksha Dutta whom I have known since early April 2020. Shiksha started her master in the molecular biology program at UdeM and given her outstanding performance has transitioned directly into the PhD program starting January 2022. Notably, this was achieved despite the fact that she started her MSc from India while navigating COVID restrictions, and she finally had the chance to arrive here in Montreal in March 2021. Overall I am vastly impressed by this student she would highly benefit from the recognition coming from a FRQ PBEEE fellowship.

Briefly, Shiksha has an outstanding track-record for an international student at her level. After performing undergrad studies in her home country (top 1% CGPA, Oxford College of Science, Bangalore University, India), she recently graduated in Biological Sciences with a CGPA of 3.7 from UNIST, Ulsan, South Korea (Graduate studies funded by an International Fellowship provided by UNIST, nominated for the best master's thesis 2019). There, she had the chance to serve as teaching assistant for the "Physical Biology of the Cell", and she was involved in the construction of cell lines to test proportion controlled alternative gene activation. A complex concept involving the measurement of cell autonomous and cells non-autonomous behaviors. This concept is highly relevant to the diverse biologic interactions found in populations of senescent cells, which we study in my lab where she is now working to study the regulation of chromatin during senescence.

Her excellent academic skills are now confirmed by her preliminary average and constant progression at UdeM (3.73/4.3 MSc and so far 4.3/4.3 PhD). She now presented her senescence-chromatin project at multiple occasions in the UdeM network and at outside meetings and she recently won best short presentation (Sherbrooke RBIQ meeting) and best PhD poster (Biologie moléculaire annual scientific day UdeM), providing insight into her excellent communication skills. Overall this is recognized by her rich fellowship and merit award track. She is fully integrated in the team, appreciated by her peers, and displays a high level of interest for her project again as reflected by the many presentations she has given and now peer recognition via competitive prizes. This is a foreign student that specifically contacted me to work in my field. Perhaps this is just me, but I find it rare that an outstanding student contact me to pursue training in my laboratory with relevant pre-existing ideas in mind. She is now thrilled to continue her training at the PhD level in the molecular biology program at UdeM.

Overall, it is without reservations that I strongly recommend Ms. Dutta for a PhD UdeM fellowship and wish her all the very best as I look forward to hearing of her future academic excellence.

Feel free to contact me if additional information is required, sincerely
