The Department of Electronics at The Oxford College organized a Power BI workshop on 6th April 2025 at The Oxford College, Bengaluru. The objective of the workshop was to introduce participants to data visualization and business intelligence using Power BI through hands-on experience with data analysis and dashboard creation. A Power BI *dashboard* is a single page, often called a canvas that tells a story through visualizations. Because it's limited to one page, a well-designed dashboard contains only the highlights of that story. Readers can view related reports for the details. The webinar concluded with an interactive Q&A session, allowing attendees to ask questions and seek clarifications.
