The Department of Fashion and Apparel Design at The Oxford College of Science organized a two-day hands-on workshop on **USHA Embroidery, Quilting, and Multi-Purpose Sewing Machines** for the students. The objective of the workshop was to enhance the technical knowledge and practical skills of budding designers in advanced machine operations, creative stitching, and fabric embellishment techniques. The workshop proved to be highly beneficial, bridging the gap between theory and practice. It not only enriched the students' technical competence but also inspired them to incorporate advanced machine techniques into their design projects. The Department expressed gratitude to USHA for their support and expertise, and to the faculty coordinators for organizing such a fruitful learning experience.
