

Hi I am Jitendra final year students pursuing Bachelor of science in Biotechnology and Biochemistry in the The Oxford College of science. My journey at these college provided me with an excellent academic foundation but also fostered an environment where I could grow personally and professionally.

When I specially focused on the “Department of Biotechnology” I feel really proud to being a part of these department. The teachers here are very supportive, friendly, and always ready to help us understand even the toughest topics. They make learning fun and interesting by combining theory with practical knowledge in the labs.

And The labs are equipped with modern instruments which make learning better and solve problem.

Also ,We get chances to attend workshops, seminars, and hands-on training that help us improve our skills and prepare for future careers. The department always encourages us to ask questions, think critically, and explore new ideas in science. Overall, my experience in the biotechnology department has been amazing. It has helped me grow not only as a student but also as a person. I am thankful for all the guidance and support I received
