I am T Salahuddin currently pursuing my Bachelor of Science in Biotechnology and Genetics at Oxford College of Science, Bangalore. As a third-year student, I've experienced firsthand the institution's dedication to fostering scientific excellence through its rigorous academic framework and cutting-edge research its exceptional balance of theoretical depth and practical application. The Department of Biotechnology Genetics has been particularly instrumental in shaping my analytical skills, with faculty members who are both domain experts and passionate mentors. Our well-equipped Animal/plant tissue lab instrumental lab have allowed me to apply classroom concepts to real-world experiments, significantly enhancing my technical competencies. Beyond academics, I've benefited from the college's emphasis on holistic development through programs, clubs, hese experiences have not only complemented my scientific training but have also helped me develop essential soft skills in communication and teamwork.
