"Pursuing my M.Sc. in Chemistry at The Oxford College of Science has been a transformative experience. The faculty members are not only knowledgeable but also incredibly supportive, always encouraging us to explore beyond textbooks. The hands-on lab work and interactive teaching methods have greatly deepened my understanding of chemistry. Additionally, I gained valuable research exposure by working on projects at CECRI, DEBEL, and proud to have published a book chapter with Elsevier, marking a significant milestone in my academic journey. These experiences have been instrumental in helping me secure a Ph.D. opportunity"

"Being a rank holder in the M.Sc. Chemistry program with 8 gold medals is a proud milestone in my academic career. The journey was filled with challenges, but the incredible faculty, research-oriented and dynamic learning atmosphere at The Oxford College of Science kept me motivated. I truly appreciate the opportunities provided, which have laid a strong foundation for my future in chemistry."

"The academic environment while pursuing B.Sc., at TOCS played a crucial role in my success in the CUET (Chemistry) exam. The faculty provided in-depth subject knowledge, conducted regular discussions, and encouraged us to solve advanced-level questions. Their guidance continuous support, and mentorship made my preparation much more effective."
