

Alumni Testimonial

Nazia Farheen

UUCMS : 15RNSAC015 (Batch 2015-2017)

I am immensely proud to be an alumni of Oxford College of Science, Bangalore, where I pursued my Master of Computer Applications (MCA). My time at the college was a transformative experience that played a crucial role in shaping my academic and professional journey. Currently, I am working at St. Anne's First Grade College for Women, and I attribute a significant part of my success to the strong foundation laid during my MCA years at Oxford College of Science.

One of the standout aspects of the college is its state-of-the-art infrastructure. The well-equipped computer labs, modern classrooms, an extensive library, and a student-friendly campus environment created the perfect setting for academic excellence and research. The institution's commitment to providing a holistic learning experience was evident in every aspect, from advanced curriculum design to practical exposure through hands-on projects, seminars, and industrial visits.

The college boasts a highly experienced and supportive faculty who are not just educators but also mentors who guide students at every step. Their unwavering support, encouragement, and dedication made a profound impact on my academic progress. Whether it was assisting with coursework, helping in research projects, or providing career guidance, the faculty members always went above and beyond to ensure that students received the best possible education and mentoring.

Oxford College of Science also provided numerous opportunities for skill development, including technical workshops, hackathons, and guest lectures from industry experts. These initiatives helped bridge the gap between theoretical knowledge and practical application, making us industry-ready professionals. The emphasis on teamwork, leadership, and innovation prepared me for the challenges of the corporate world and higher education sector alike.

Apart from academics, my college life was enriched by various extracurricular activities that helped in developing my personality and leadership skills. Events such as tech fests, coding competitions, and cultural programs provided a platform to explore our creative sides and interact with peers from diverse backgrounds. These experiences instilled confidence and helped me build lifelong friendships and professional networks.

The support system at Oxford College of Science extended beyond academics. The placement cell played a crucial role in preparing students for their careers by conducting mock interviews, resume-building sessions, and technical training. Their efforts ensured that we were well-prepared to step into the professional world with the necessary skills and confidence.

I wholeheartedly recommend Oxford College of Science to aspiring students who are looking for a place that not only imparts quality education but also nurtures personal and professional development. Being a part of this esteemed institution has been an honour.

Thank you, Oxford College of Science, for shaping my future and being a part of my journey towards success!
